WORK EXPERIENCE

Software Developer ABC Services Pvt. Ltd.

06/2023 - Present

Mumbai

ABC Services: Global provider of tailored web applications, portals, and ERP solutions using open-source technologies

Tasks

- Successfully conducted API design and development of RESTful Services, enhancing operations of the enterprise product
- Conducted sessions on new technologies aimed at enhancing development processes and improving the end product
- Built web services with J2EE, improving the time on page for the average user by 2 minutes
- Worked within an agile team of 5 developers, prioritizing/scoping feature requests to ensure that the biggest impact features were worked on first
- Handled API integration using React, seamlessly incorporating external services or data sources into the application for enhanced functionality

Engineer-Cloud & Infra Services YZ Company

07/2022 - 05/2023

Achievements/Tasks

- Underwent 3 months of training on various technologies (AWS, Azure, OS) and was recognized as the best trainee performer among 126 members
- As a Support Engineer, developed and maintained automation for cloud-based resources using CloudFormation
- Contributed to the design and implementation of highly-available cloud infrastructures using AWS
- Utilized AWS Services including EC2, S3, VPC, Lambda, API Gateway, CloudWatch, CloudFront, Cognito, and Lambda Authorizer

EDUCATION

Bachelor of Engineering Example College of Engineering

08/2018 - 06/2022

8.21 CGPA

Courses

- Database Management System
- Project Management
- Agile Methodology
- Team Management

SKILLS

DSA

Spring Core

Spring Cloud

Java

Micro Services

Spring Boot

Spring Data JPA

Spring Security

REST API

MySQL

Docker

AWS

Linux

Maven

Git

HTML

CSS

JavaScript

React

Unit Testing

PROJECTS

ERP Acme

- Implemented Redis Cache on the backend, significantly cutting API response time from 5 minutes to 30 seconds for fetching 10k plus records
- Developed an interactive dashboard using React-Chartjs-2 and Chart.js packages, empowering clients to make informed decisions with visually insightful data representations

NNPC (Nigerian National Petroleum Corporation)

- Led NNPC website development, leveraging React, Chart.js, D3.js, and Spring Boot
- Crafted REST APIs to manage User and Product services, seamlessly integrating them into microservices architecture using Spring Eureka
- Utilized React to implement APIs on the frontend, ensuring a seamless user experience. Developed an interactive dashboard employing D3.js, Chart.js, and React-Chartjs2 libraries for enhanced visualization and user engagement
- Collaborated with the team to deliver a highly responsive and visually appealing platform
- Played a pivotal role in the project's success through a hands-on approach and collaborative spirit

CERTIFICATES

Microsoft Certified: Azure Fundamentals

Earned Microsoft Certified: Azure Fundamentals cert, showcasing grasp of core Azure concepts, pricing, security, privacy, compliance, and trust
